

## HOW WE SUPPORT DESIGN PROFESSIONALS

We deeply respect Design Professionals, as we both appreciate how good design improves lives. As specialists in solutions that focus on meeting organizational needs, California Closets excels at collaboration.

### INTERIOR DESIGNERS

We're extremely flexible and can adapt to meet your needs. With 150 showrooms conveniently located across North America, you and your clients can experience the California Closets difference firsthand. Our Design Studio, located within our showroom, is where the "magic" happens. Our 3D modeling tools help bring your designs to life and enable your client to virtually tour their customized solution. Since we offer a combination of exclusive finishes, accent materials, hardware, and accessories that work

with any style and palette, their custom organizational solution will blend seamlessly with the rest of the project.

### KITCHEN & BATH DESIGNERS

Projects centered around kitchens and baths often require custom storage solutions like walk-in and reach-in closets, pantries, beverage stations, wine storage, make-up stations, and linen closets. We design custom systems for all these areas and more, and have products and finishes to complement any project.

### ARCHITECTS

We support our Architect Partners by making it easy to work with us. We provide an AIA Spec written in CSI Format that's CSI approved. We offer help with project budgeting and specification, provide finish samples, and will edit the Spec at your request. We can work from blueprints and provide 3D color renderings for all projects. Our unmatched selection of materials and finishes work with any architectural style, making us the ideal partner for all your projects.

## Join our Trade Program

We offer preferred pricing to all our valued Trade Partners.
